Abstract

Phishing has become an increasing problem in recent years, leading to the divulging of sensitive information to unauthorized individuals. We will address what phishing is, the damage it causes, typical tricks to get you to divulge sensitive information and methods to mitigate this problem.

Keywords: Phishing Malware

Biographies

Tina Ashford is an Associate Professor of Information Technology at Macon State College, specializing in Information Assurance and Networking. Prior to her tenure at MSC, she served on the faculty at William Woods University and Central Missouri State University. Ms. Ashford has over 20 years experience in the field.
