Proceedings of the 2018 Informing Science + IT Education Conferences (InSITE)

Table of Contents

Flipping Business Computing Class: An Integration of Design Thinking and Blended Implementation in the Vietnamese Educational Culture
Ashish K Das, Quynh T Nguyen, An T Nguyen, Susan Thomas  ...................................... 1-11

Introducing DigLit Score: An Indicator of Digital Literacy Advancement in Higher Education
Jorge Pérez, Meg Murray  .................................................................................................. 13-20

The Support of Human Factors for Encompassing Business Intelligence
Rimvydas Skyrius, Svetlana Skyrius Nemitko ................................................................... 21-34

How Content Volume on Landing Pages Influences Consumer Behavior: Empirical Evidence
Ruti Gafni, Nim Dvir ......................................................................................................... 35-53

N Bruce Walton ................................................................................................................. 55-64

Interactive 3D Representation of Business Case Studies in the Classroom
Andrew Zaliwski, Karishma Kelsey ................................................................................... 65-78

The Persistence of Anxiety Experienced by New Generation in Online Learning
Dennis Kira, Fassil Nebebe, Raafat George Saadé ............................................................ 79-88

Exploring the Features of Social Media to Promote Research Activities
Helen U. Emasealu, Susan N. Umeozor ......................................................................... 89-101

Capturing Bio-Sensing Solutions: Biomonapp’s Story about the Seasons of Change across a Global Sustainable Landscape - Monitoring for Sustainable Bioremediation in Rural & Urban Farms, Soil, Agronomy, & Aquaculture
Christine M. Cunningham ............................................................................................. 103-126

Managing Volunteer Retention Through Socialisation – A Study of Volunteers in an Australian Emergency Service Agency [Abstract]
Michael Jones, Yoke Berry, Irit Alony ............................................................................ 127-128

Performance Measures for the 21st Century [Abstract]
Nitza Geri ....................................................................................................................... 129-130

Mobile Devices and Parenting [Extended Abstract]
Mina Richards ................................................................................................................ 131-135

Personality Traits and Hedonic, Sociability, and Compulsive Use of Facebook: A Study of College Students [Abstract]
Yingxia Cao, Haya Ajjan, Richard Hartshorne .............................................................. 137-139

Personality and Online Shopping Outcomes: A Study of Young Adult Chinese Consumers [Abstract]
Yingxia Cao .................................................................................................................... 141-144

Investigation of Factors for Adopting Mobile Commerce in Developing Country [Abstract]
Anil Gurung ...................................................................................................................... 145
The revised versions of the following Proceedings papers were fast-tracked to other Informing Science journals

Impact of Mathematics on the Theoretical Computer Science Course Units in the General Degree Program in Computer Science at Sri Lankan State Universities
Thambithurai Sritharan ................................................................. 901

Virtual Pathology Learning Resource: A Promising Strategy in Teaching Pathology to Allied Health Science Students
Jyothi Thalluri, Joy Penman ............................................................. 902

Changing Paradigms of Technical Skills for Data Engineers
Robert T. Mason ................................................................................ 903

Predicting Suitable Areas for Growing Cassava Using Remote Sensing and Machine Learning Techniques: A Study in Nakhon-Phanom Thailand
J. Kimani Mbogua, Watanyoo Suksa-ngiam ..................................... 904

Medical Image Security using Quantum Cryptography
Olufunso Dayo Arowolodu, Gabriel Kayode Adelaja, Boniface Kayode Alese, Olufunke Catherine Olayemi ................................................................. 905

Increasing Intrinsic Motivation of Programming Students: Towards Fix and Play Educational Games
Selvarajah Mohanarajah .................................................................. 906

Place Determinants for the Personalization-Privacy Tradeoff among Students
Maor Weinberger, Dan Bouhnik ................................................................ 907

Henryk Krawczyk, Andrew Targowski ................................................... 908

Decision Support Information System for Urban Lighting
Michael Dreyfuss, Yahel Giat .................................................................. 909

From Ignorance Map to Informing PKM4E Framework: Personal Knowledge Management for Empowerment
Ulrich Schmitt ....................................................................................... 910

Changes in Public Institutions as a Function of Technology and Its Impact on Society
Josueth Meza ...................................................................................... 911

Authentic Assessment Design in Accounting Courses: A Literature Review
Clara Nkhoma, Mathews Nkhoma, Long Ky Tu ........................................ 912

A Data Science Enhanced Framework for Applied and Computational Math
Kirby McMaster, Samuel Sambasivam, Brian Rague, Stuart Wolthuis .......... 913

How to Design Accounting Video Lectures to Recover Lost Time
Thando Loliwe ..................................................................................... 914

Analytical Investigation of the Characteristics of the Dropout Students in Higher Education
Yehia Mortagy, Seta Boghikian-Whitby, Ibrahim Helou .................................. 915

Addressing Information Literacy and the Digital Divide in Higher Education
Nicole Buzzetto-Hollywood, Hwei Wang, Magdi Elobeid, Muna Elobaid ........................ 916

An Examination of Gen Z Learners Attending a Minority University
Nicole Buzzetto-Hollywood, Ayodele Alade ................................................................. 917

South Africa’s Quest for Smart Cities: Privacy Concerns of Digital Natives of Cape Town, South Africa
Valerie Tshiani, Maureen Tanner ................................................................................... 918

Multilevel Authentication System for Stemsing Crime in Online Banking
Boniface Kayode Alese, Aderonke F Thompson, Olofunso D. Alowolodu,
Blessing Oladele ........................................................................................................... 919

The Ways of Prosumers’ Knowledge Sharing with Organizations
Ewa Ziemba, Monika Eisenbardt ...................................................................................... 920

Informing on a Rugged Landscape: How Complexity Drives our Preferred Information Sources
T. Grandon Gill, Matthew Mullarkey, Ronald K Satterfield ........................................... 921

Teacher Presence and Social Presence in Virtual and Blended Courses
Gila Cohen Zilka, Revital Cohen, Ilan Daniels Rahimi ................................................ 922

Identifying Barriers to Integration of Technology into Traditional Approach of Teaching: A Case
Study of Mathematics Teachers in Former Transkei in the Eastern Cape
Agyei Fosu ...................................................................................................................... 923

Review Process

Unless otherwise noted, all papers were reviewed blindly (that is, with author and affiliation
information removed) by between 6 and 10 external reviewers. The reviewers did not know the
identity of the authors nor the authors the identity of the reviewers. Reviewers were matched to
papers using a formula to minimize the psychological distance between reviewers’ stated expertise
and interest and the topics covered in the paper. In cases where this formula did not provide at least
6 reviewers, reviewers were randomly assigned to papers. No reviewer was required to review more
than 3 papers.

Reviewers were instructed to mentor the authors by providing feedback on how to improve the
submission. They were further required to recommend whether or not the paper should be accepted
using a six-point scale (from “reject” to “must accept”).

The authors of all papers, whether accepted or not, were provided with the reviewers’ feedback as
part of our process of mentoring authors. Authors of accepted papers were required to revise their
submissions in light of the issues raised in the reviews.

We believe that the papers in these proceedings represent a great contribution to science.
