***Scott Lloyd, Informing Science:
The International Journal of an Emerging Transdiscipline***

slloyd1@cox.net

Purpose

The Informing Science Institute publishes seven journals as well as books. All Informing Science Institute journals and books are available to everyone online without charge as well as in print. All ISI journals use a review process that provides authors with a positive and constructive experience, regardless of whether or not their papers are accepted for publication.

The Editors-in-Chief (EiCs) discuss the review process and how they, their Associate Editors, and the journals reviewers mentor potential authors. They also provide tips to help you get your best

manuscripts published quickly. Lastly, they describe their journal's mission to help you determine which journal is the best match for your paper.
